## PROFILE

I am a Software engineering (mobile application development) student with a strong passion for building, not only mobile applications but building responsive and performant web applications with great user experiences. I have further interests in graphic designing and cyber security. I live by a motto that says "Failure is only achieved when you give up, take the lesson and try again. Never give up." This pushes me to believe in myself when faced with difficulties.

## SKILLS

**Languages:** Python, Java, Javascript, HTML, Css

**Databases:** MySQL, SQLite

**Tools:** Android Studios, Visual Studios, StarUML, Adobe Photoshop, Adobe Illustrator, Adobe After Effects

## PROJECTS

### M&M Notification Mobile App

- Android mobile application, coded in java, that allows users to set reminders and receive timely notifications.

### Course Registration Mobile App

- Android mobile application, coded in java, that allows users to register students for courses offered and update their records.

### Google Search Bot

- The bot allows users to input any search word and receive a list of results via [google.com](https://www.google.com)
